

2023 Profile

Global Institutional Profiles Project

Aristotle University of Thessaloniki

Thank you for
your continued
participation and
support of the
global Institutional
Profiles project!

Introduction

The global Institutional Profiles project creates accurate and comprehensive profiles of research institutions around the world.

With reliable and objective data on each institution, users of the data in these profiles and elsewhere are better equipped to:

- validate and quantify executive and strategic decisions
- support marketing, publicity and other promotional efforts
- supplement rankings and other assessment initiatives with additional indicators of excellence

By working closely with a multitude of personnel from universities and other related institutions around the world, we have been able to create the richest, clearest profiles to date—portraits of facts and figures on research activity, funding, students, and staff, supported by verifiable indicators from Clarivate™.

About the Report

This Profile supplements the Institutional Profiles data available in *InCites*™ and is provided to organizations contributing to the Institutional Profiles project. It is based on data from three main sources: data provided by the institution directly to Clarivate; data on the institution's publications and citations from Web of Science™; and the results of the annual Academic Reputation Survey.

For more information please see:

<https://clarivate.com/webofsciencegroup/globalprofilesproject/>

Clarivate has conducted extensive validation of the data and applied powerful analytical techniques to interpret and present the data in a meaningful way.

This Profile and all data included herein may be used as a promotional and/or marketing device, as a management tool to be shared internally with colleagues for purposes of evaluation, or to provide institutional research executives with information on research performance. The information in this report may be used to assist students or faculty in the selection of your institution. You may use this report in the following ways:

- Post it on your institution's website (see below)
- Share with administrators at other institutions
- Submit with research assessments or government and funding proposals

Please note the data tables and individual performance results are the property of Clarivate. Use of any of the information must include the following notice: *"Clarivate reserves all rights to the data and data should not be extracted, republished, redistributed or used for any commercial purpose."*

Brief Description

The Aristotle University of Thessaloniki (AUTH) has been established in 1925 and is one of the largest in Europe. It consists of 11 Faculties and 41 Schools, serving a broad array of scientific fields, ranging from natural and technological to social and health sciences, arts and humanities. It offers 43 Undergraduate Programs and around 200 MSc Programs

About 50.000 undergraduate and postgraduate students study at the AUTH, while the teaching staff is around 2600 (FTE) and the administrative around 700.

The AUTH conducts research, participates in European research programmes and projects, cooperates with international institutions and organizations, and attracts outstanding researchers from within Greece and abroad.

AUTH is widely recognized as a vibrant center of learning which draws its inspiration from a long tradition of academic achievement and prides itself in its international role.

AUTH holds around 200 bilateral agreements with Universities around the globe to promote research, academic cooperation and communication among students and faculty and has more 1750 inter-departmental agreements in the framework of Erasmus+ and Erasmus+ International program. Since 2019 AUTH participates in the "European University" Initiative, as member of the "EPICUR" alliance.

Note: Values and scale on tables and diagrams are cumulative probability scores, representing your institution's place compared to other institutions. Dotted line on the diagram represents a cumulative probability of 50 i.e. the median value. Maximum value is 100.

Summary

We hope you find this report informative and look forward to many years of collaboration to improve our multidimensional approach to institution profiling, data validation, and qualitative assessment. For over half a century, Clarivate has pioneered the world of citation indexing and analysis. All of our analytics tools and services are underpinned by the gold standard citation data in the Web of Science. We are therefore uniquely positioned to help you and your institution make informed decisions about current and future research and organizational strategies. We look forward to continuing our partnership with you and welcome any feedback you may have.

The data presented in this report represent just a fraction of what you can obtain when you subscribe to InCites Benchmarking & Analytics, the web-based evaluation tool. The InCites platform enables you to access article-level data, aggregated data, patent data, awarded grants data, and metrics to assess the impact and influence of people, departments, institutions, regions, and publications within the broader research ecosystem.

InCites allows you to objectively and accurately assess the return on your research investments and activities. Starting with a foundation of trusted Web of Science data, you can create visually impactful reports to help:

- **develop** a clear picture of the research activity at your organization - an indicator of future success
- **measure and benchmark** the research performance of your people and programs to peer institutions to understanding your position and develop strategies for the future
- **identify** collaborations that advance your strategic goals and support internal review, reporting and promotional processes

About Clarivate

Clarivate™ is a global leader in providing solutions to accelerate the lifecycle of innovation. Our bold mission is to help customers solve some of the world's most complex problems by providing actionable information and insights that reduce the time from new ideas to life-changing inventions in the areas of science and intellectual property. We help customers discover, protect and commercialize their inventions using our trusted subscription and technology-based solutions coupled with deep domain expertise.

For more information, please visit www.clarivate.com

About the Web of Science

The Web of Science™ is the world's largest publisher-neutral citation index and research intelligence platform. It organizes the world's research information to enable academia, corporations, publishers and governments to accelerate the pace of research.
