About the QS Intelligence Unit

The QS Intelligence Unit (QSIU) has been operating the QS World University Rankings® since 2004. The team now numbers 15 people and, in addition to these rankings, by the end of 2011 will have published regional rankings in Asia and Latin America as well as discipline level rankings in 26 separate subjects. For details of our work, including detailed descriptions of our methodologies, please visit our website on www.iu.qs.com.

For more detailed analysis of the performance of your own institution and benchmarking respect to selected others or national and regional norms, please contact us on intelligenceunit@qs.com.

- * These data may differ from those supplied. Ratio calculations involve Full Time Equivalent (FTE) numbers of faculty and students. Where these were not supplied adjustments have been made to ensure comparability between institutions. Adjustments are made based on ratios derived from the analysis of other institutions in the country or region which have supplied more complete data.
- ** Data is drawn from Scopus for a five year window - in this case 2006-2010. Numbers relate to publications during the given period and citations for those papers during the same period. Numbers may differ from those retrieved from Scopus as QS has conducted additional mapping that aggregates multiple records and may retrieve more data. Additionally Elsevier frequently add records to Scopus and backfills for editions during the evaluated period. In 2011 we have been able to exclude self-citations for the first time.
- *** Rank positions outside 400 are generally presented in ranges - for the purposes of the history view, positions are expressed as the bottom limit of the range in which they appear.
