WELCOME TO THE 2020 QS WORLD UNIVERSITY RANKINGS BY SUBJECT

Welcome to your institution's fact file for the QS World University Rankings by Subject 2020.

This file provides the scores for your institution in the subjects that you have been evaluated in, as well as the scores and ranks for those subjects where you made it into the published rankings table. It should also provide you with useful information for any media communication you might need to prepare prior to launch.

To produce the rankings for this year the team analysed over 22 million papers, producing close to 200 million citations. 1,368 institutions have been ranked across 48 subjects in 5 subject areas, creating over 15,500 published entries. These figures reflect some of the scale behind this huge undertaking that the team carries out in order to produce these subject rankings.

The first section contains an "at a glance" summary of your institution's performance across the board in all the subject areas covered. The wheel chart is a graphical representation – brightly coloured bars indicate that you have achieved a score in that subject; the longer the bar the higher the score you have attained. A pale bar in a subject area indicates your performance in the broad subject area.

The next table shows a summary of your scores and ranks in all the subjects you have been ranked in including a column which also shows your domestic rank in that subject. The following table then shows you your results in the subject rankings for the last three years so you can track your progress.

In the Appendix you will find an explanation of the weightings that make up the different subject tables, the evolution of the subject rankings exercise, the paper thresholds that we have used in this edition and an indication of the number of institutions considered and ranked.

I hope you will find this useful, but we have also prepared a more extensive EXTENDED FACT FILE for you, presenting your institution in context, subject by subject, indicator by indicator in greater depth. Please file a request via the link attached in the email and the team will aim to get back to you within a couple of days depending on the volume of requests.

Selina Griffin Rankings Manager, QS

NOTES:

There are different reasons why an institution may not have results in any given subject.

- 1. It may not offer a program
- 2. It may not have published a sufficient number of papers
- 3. It may not have attracted a minimum level of recognition through our surveys.
- 4. Receiving a score for a particular subject does not guarantee that we have checked for its presence in your institution. These checks are only carried out for institutions with a score high enough to receive a published rank in the subject.

ARISTOTLE UNIVERSITY OF THESSALONIKI

ARTS & HUMANITIES | PAPERS AND CITATIONS COUNTS - DIFFERENCE AGAINST GLOBAL MEAN BY SUBJECT

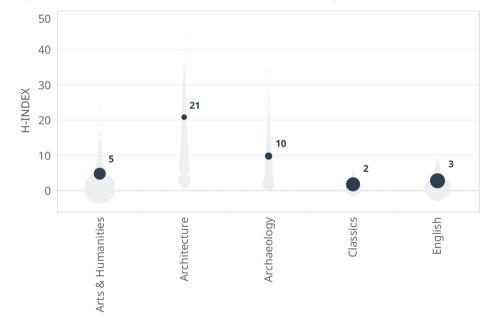

The chart below presents the relationship between **the institution's counts of papers and citations** and the respective global means by subject. A ratio of 1.0 represents a performance on a par with the global average.

In 2020, Architecture delivered the best relative results in terms of citations for Aristotle University of Thessaloniki, representing roughly 0.7 times the global average. On the other hand, the institution published 0.7 times the average number of papers indexed globally over the 2013-2017 period.

ARTS & HUMANITIES | H-INDEX BY SUBJECT

The chart provides a view of the performance in the h-index, highlighting the **institution's index** against the global performance. The size of the bubble represents the total number of institutions recorded in each performance level.

In the 2020 edition of the rankings, Architecture was Aristotle University of Thessaloniki's subject with the highest h-index at 21. This means that 21 papers published by the institution from 2013-2017 attracted at least 21 citations in a six year period (2013-2018).

ENGINEERING & TECHNOLOGY

RANKINGS PERFORMANCE - ENGINEERING & TECHNOLOGY AND RELATED SUBJECTS

| Engineering & Technology | Chemical Engineering | Civil Engineering | Computer Science | Electrical Engineering | Mechanical Engineering |

The chart below presents the relationship between **the institution's counts of papers and citations** and the respective global means by subject. A ratio of 1.0 represents a performance on a par with the global average.

In 2020, Social Sciences & Management delivered the best relative results in terms of citations for Aristotle University of Thessaloniki, representing roughly 0.8 times the global average. On the other hand, the institution published 0.8 times the average number of papers indexed globally over the 2013-2017 period.

SOCIAL SCIENCES & MANAGEMENT | H-INDEX BY SUBJECT

The chart provides a view of the performance in the h-index, highlighting the **institution's index** against the global performance. The size of the bubble represents the total number of institutions recorded in each performance level.

In the 2020 edition of the rankings, Business was Aristotle University of Thessaloniki's subject with the highest h-index at 17. This means that 17 papers published by the institution from 2013-2017 attracted at least 17 citations in a six year period (2013-2018).

DEFINITIONS,
WEIGHTINGS,
THRESHOLDS,
AND HEADLINE FIGURES

METHODOLOGY: DEFINITIONS & WEIGHTINGS

ACADEMIC REPUTATION

Between 2015 and 2019 QS has collected votes from over 94,000 academics around the world. Each academic counted has given their opinion on universities in their fields of expertises.

The employability metric is based on employer reputation. Over 44,000 global employer votes have been taken into account between 2015 and 2019 giving us a large pool of information

EMPLOYER REPUTATION

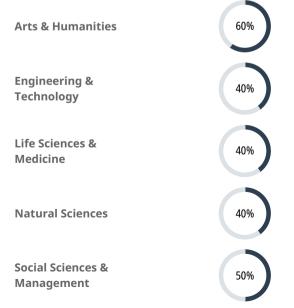

The employability metric is based on employer reputation. Over 44,000 global employer votes have been taken into account between 2015 and 2019 giving us a large pool of information in terms of hiring levels. Employers across all sectors and industries have taken part in the survey and include Facebook, Google, Uber, Wells Fargo, Bank of America etc.

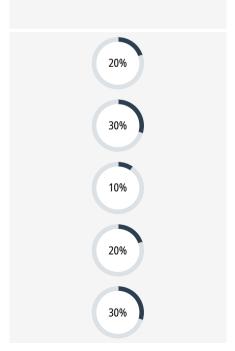

CITATION

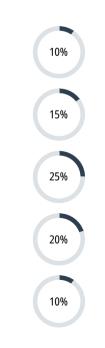

This ratio measures the average number of citations obtained per publication, and is an estimate of the impact and quality of the scientific work done by universities. To avoid anomalous results, only the institutions producing a minumum number of papers in the last five years are evaluated.

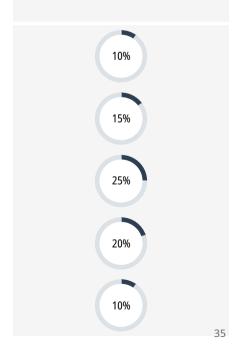

H-INDEX

The h-index is an index that attempts to measure both the productivity and impact of the work published by the insitutions' scientists and scholars. The index is based on the set of the institution's most cited papers and the number of citations that they have received in other publications.

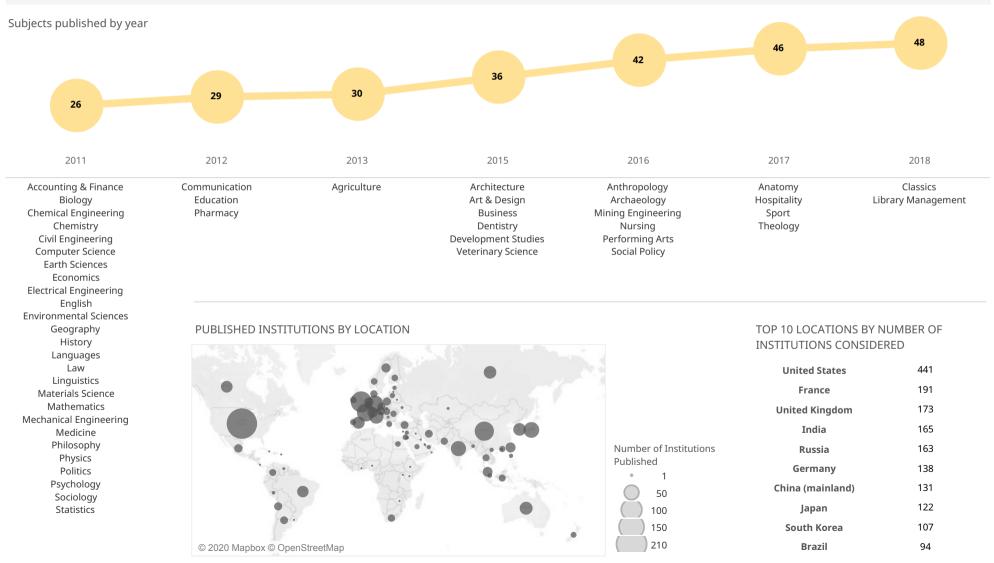

We use a variable approach to the weightings for the different subjects. The chart below provides details of the combinations used in the 2020 edition of the rankings.

The **QS World University Rankings**® **by Subject** ranks the world's top universities in individual subject areas, covering 48 disciplines as of 2020. A list of the considered subjects, grouped by the year of first release, is presented below.

The charts below present the number of institutions considered and published in each of the relevant subject areas.

INSTITUTIONS CONSIDERED AND PUBLISHED BY SUBJECT - YEAR 2020

Subjects with highlight color have extended publishing ranges.

In the QS Subject Rankings methodology, a specialization adjustment is applied to the original reputation scores in order to boost the performance of those institutions that present a stronger focus in specific subjects. The original rank calculated for each subject is compared against the rank obtained in the relevant broad subject area containing the said subject according to the QS mapping. For example, the results in Biology are compared against the overall rank in Life Sciences & Medicine. Whenever the rank difference between the subject and the broad area exceeds five places, a positive or negative adjustment is applied in the Reputation score. The method compares the proportional difference for each institution against the maximum and minimum recorded globally. The maximum change cannot exceed the percentages presented in the chart below.

DISTRIBUTION OF SPECIALIST ADJUSTMENTS - REPUTATION

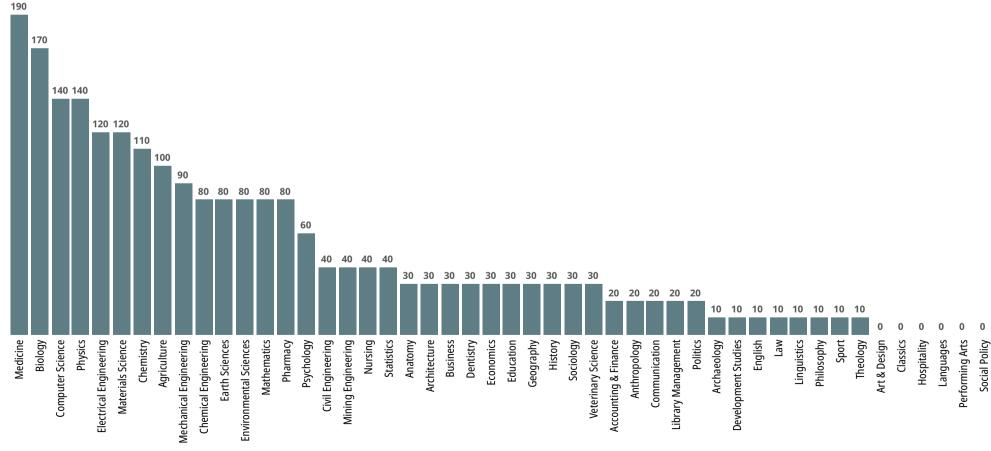

In order to feature in any discipline table, an institution must meet three simple prerequisites:

- Offer undergraduate or taught postgraduate programmes in the given discipline
- Exceed the minimum required score for the academic and/or employer reputation indicators
- Exceed the five-year threshold for number of papers published and indexed by Scopus in the given discipline

The following chart discloses the minimum number of papers required to be considered in the latest edition of the rankings by subject.

PAPER THRESHOLD BY SUBJECT - YEAR 2020
MINIMUM NUMBER OF PUBLICATIONS INDEXED BY SCOPUS REQUIRED TO BE CONSIDERED IN THE RANKINGS.
